### B. Job function:

- Serves as single point of contact for the design activities within the company (BBVN) and for external stakeholders mainly during the design phase but also during construction phase.
- Co-manages the design inputs and/ or RFI's within project and operation team as well as External Parties; follow up all open points until they are sufficiently clarified.
- Ensures the design inputs/ RFI responses are provided in time to External Parties.
- Coordinates, and participates in, design development meetings and design review workshops (e.g. constructability reviews of design documents). Manages review/comment logs and keeps detailed meeting records.
- Performs 1st level reviews of design deliverables by External Parties for compliance with project requirements (e.g. assesses documents on completeness and accuracy and provides comments and revisions)
- Supports concerning the manufacturing process, e.g.
  - Conduct process mechanical design review by checking process flow diagrams (PFD) and piping & instrument diagrams (P&IDs)

- Review specifications for process equipment and installation
- Review and/or prepare basic piping system design, pump sizing, mass & heat balances, functional & installation specification, as well as process and instrumentation & control principles
- Assists on process validations
- Assists in generating specifications for complex process equipment
- Assists PM and BBVN's legal team on the generation of permitting documents and monitors the status of permitting activities handled by External Parties managed by the project team.
  - Monitors the project progress during design and construction phase to make sure the deliverable and performance of External Parties are on track and meet project objectives.
  - Acts as an interface between project team, operation team and subject matter experts to assist PM to develop a project detailed schedule.
  - Assist the Project/ Construction Management team during the construction phase on construction activities (e.g. clarify matter related to design, participate in site meetings, and review technical documents and other submissions).
  - Assesses project issues or risks with respective in particular to technical/ constructability and reporting to PM.
  - Undertakes other project tasks as required.

### **C. Job requirements:**

- Minimum of 3 years of on-the-job design co-ordination experience in small to medium scale industrial projects
- Familiarity with project management and knowledge of engineering, construction management in industrial best practice is preferred
- Basic knowledge of construction law and building codes
- Preferred to have working experience on pharma/medical device/ liquid handling project
- Preferred to be knowledgeable in principles of process and equipment validation and cGMP's
- Hands-on experience with MS Office, MS Project and AutoCAD and if possible REVIT
- English spoken fluency
- Attention to detail
